This action is in response to amendment B, paper #14, filed 05/12/03.

DETAILED ACTION

Drawings

1. The corrected or substitute drawings were received on 05/12/03. These drawings are accepted.
2. The drawings are objected to because figure 8 shows "heterojunction interface 14". It is believed to be a typographical error in that it should read heterojunction interface 14". A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-2, 4-5, 13-16, and 18-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Toshiyuki (JP 10-424586).

Toshiyuki teaches the device of claims 1-2,4-5,13-16, and 18-19 in that a buffer layer of GaN (a type III-V) compound semiconductor (as in claim 19) is heavily doped (substantially) with cadmium (abstract and paragraph 0011). The dopant concentration

is 2×10^{15} to 2×10^{17} as in claims 4 and 18 (not less than 1×10^{17}) (paragraph 0022). As other dopants may be 1×10^{15} to 1×10^{17} , (paragraph 0011), the range teaches the layer to be doped mostly with cadmium as in claims 5 and 13. Paragraph 0003 teaches that the device may be used as a light-emitting device as in claim 14. Regarding claim 15, which limits the device to having an active layer on the insulating nitride layer, the specification (page 18) describes this layer as GaN layer 4. Toshiyuki forms a GaN layer (4) over the buffer layers. As the layers are of the same material and in the same location, the layer must also be an active layer.
